FURKAN HAKAN KARAASLAN

SUMMARY

I'm Hakan, a Computer Engineering student at Galatasaray University. I like to code Web3 applications using Solidity and Hardhat. Also I've created many websites and mobile app using React (Native), JavaScript and Typscript. But my biggest advantage is I'm a fast-learner.

TECHNOLOGIES

-JavaScript, TypeScript, Next.JS
-Solidity, Hardhat
-React, React Native, Android Studio
-SQL (MySql, PostGre)
-Puppeteer

LANGUAGES I SPEAK

-English
-French
-Turkish

EDUCATION

Galatasaray University - Computer Science(4ᵗʰ Class)
09/2018 - Still Ongoing

Trabzon Science High School
 09/2014- 06/2018

SKILLS

Solidity
Demonstrated ability to produce complex decentralized applications (dApps) using Solidity. Developed lending, staking, funding, and an Automated Market Maker (AMM) project, (all with Hardhat)showcasing a deep understanding of blockchain concepts and their application in creating secure, efficient financial transactions.

React – React Native
Skilled in creating robust web and mobile applications, including a wardrobe app and a plane ticket booking service. My personal portfolio and various websites showcase my proficiency in React and React Native.

Puppeteer
Developed a crypto bot with Puppeteer which uses MetaMask as a web3 wallet, demonstrating adeptness in automating complex web tasks. Proficient in web scraping, enabling efficient data extraction and manipulation.

PROJECTS I'VE MADE

-Uber-Like Mobile App
-DeFi Lending-Borrowing Protocol
- Cheap Flight Mobile App
-DeFi NFT Marketplace
- Wardrobe Mobile App
-Metaverse WebSite
-Basic Shopping Website
-DeFi Automated Market Maker
-DeFi English and Dutch Auction
-Netflix Clone
And many more…
